Education

Lassonde School of Engineering, York University Bachelor of Engineering (Honours), Mechanical Engineering	Toronto, ON 2023 – 2027
---	----------------------------

Work Experience

Steamoji Kelowna, Robotics Curriculum Developer <i>VEX IQ, VEXcode IQ</i> – Authoring step-by-step robotics curriculum for learners aged 12 and up across VEX IQ, Dogzilla Lite, myCobot 280, and Litebee drone platforms, including an eight-project VEX IQ autonomous programming series.	July 2026 – Present
FanRyng, Strategy Lead – Analyzed college basketball fan bases to build a state-by-state mini-game and prize strategy for a fan platform.	August 2026 – September 2026
Owning My, Client Acquisition Researcher – Researched client acquisition channels for an AI coaching business and delivered a written Growth Strategy Report.	April 2026 – May 2026
Avtopodborro, Automotive Export Assistant – Conducted vehicle inspections and prepared shipment documentation to meet international export standards. – Negotiated with clients and suppliers overseas and coordinated inventory records with sales teams.	May 2025 – September 2025
Harvel Solutions, Construction Worker (Masonry & Tile) – Interpreted technical drawings to assist with equipment installation and site documentation. – Assisted in HVAC system troubleshooting while maintaining safe and efficient job site operations.	August 2024 – September 2025
The Home Depot, Lot Associate – Assisted customers with equipment and product support while safely handling lumber, steel, and concrete.	Summer 2024

Projects

Personal Portfolio Website <i>HTML, CSS, JavaScript, Git, GitHub Pages</i> – Designed and deployed a responsive personal website hosted on a custom domain.	Fall 2026
AI Content & Lead Tools <i>Python, Claude API</i> – Built Python tools using the Claude API to generate content and business leads; published on GitHub.	Fall 2026
IoT Solar Tracking System <i>Arduino MKR 1010, Sensors, CAD</i> – Designed and built a floating solar platform with autonomous sun tracking to improve energy capture. – Integrated light sensing with dual-axis servo actuation and implemented wireless monitoring via Arduino IoT Cloud.	Winter 2026
Automated Security and Object Tracking System <i>LabVIEW, DAQ, Sensors</i> – Built a LabVIEW control system integrating ultrasonic sensors and DAQ hardware for two-axis object tracking. – Documented calibration and testing results and prepared improvement notes for future iterations.	Fall 2025
Remote-Controlled Medical Rover <i>Arduino, Ultrasonic Sensors</i> – Designed and prototyped a medical transport rover with Ackermann steering for navigation and obstacle avoidance. – Recorded test data, created wiring diagrams, and wrote build and troubleshooting documentation.	Winter 2025

Skills

Programming	Python, Java, Arduino (C/C++), HTML/CSS, JavaScript (basic), VBA (basic)
Hardware	Arduino, servo motors, ultrasonic sensing, DAQ systems, basic control systems
Software	SolidWorks, AutoCAD, Fusion 360, LabVIEW, MATLAB, Arduino IDE, Microsoft Excel, Git/GitHub
Coursework	Thermodynamics, Fluid Dynamics, Heat Transfer, Dynamics, Vibrations, Control Systems, Machine Elements Design, Mechanics of Materials, Simulation Tools for Design and Analysis

Extracurricular

GDG YorkU: Selected for an AI and infrastructure event at Google Toronto HQ (Aug. 2026)
Lassonde Bridge Building Competition: 2nd place with a structurally optimized bridge under strict load limits (2023)
